

Outreach Pre-Visit Screening

In-Home

Since our last visit, have you had any of the following:

1. A new fever (100.4°F or higher), or a sense of having a fever?
2. A new cough that you cannot attribute to another health condition?
3. New shortness of breath that you cannot attribute to another health condition?
4. A new sore throat that you cannot attribute to another health condition?
5. New muscle aches (myalgias) that you cannot attribute to another health condition, or that may have been caused by a specific activity (such as physical exercise)?
6. Recent loss of sense of smell or taste?

If client answers yes to any of the above questions, outreach should not occur. Provide phone or telehealth services.

- Consult with supervisor before making visit.
- Direct client to contact their primary care provider (PCP). If client is unable to make this call, offer to assist them.

Residential Facilities – update – no visitors are allowed at Residential Facilities

Skilled Nursing Facilities – update – no visitors are allowed at SNFs

In Addition:

When interacting with clients or providers:

- Express that you are not shaking their hand and will keep distance to ensure the health and safety of you and them (precaution).
- Keeping a 6 foot distance from others is recommended.
- Whenever possible wash your hands with soap and water for at least 20 seconds before entering and leaving a home or facility; if unable to wash hands use hand sanitizer.
- If there are any questions regarding next steps, consult with your supervisor.
