

# Compass Health *Bridge*

Mobile Telehealth System

Compass Health *Bridge* is a mobile telehealth system that enables behavioral health providers to connect virtually with clients in community or home settings.

With this telehealth system, clients and providers can communicate via HIPAA-compliant, secure video chat for psychiatric counseling, case management, and more.

## A System in Three Parts

A HIPAA-compliant, cloud-based platform built on Zoom that enables secure video chat.

A proprietary mobile device that providers can bring to client's homes or community settings.

A secure link where clients can interact with their providers utilizing their own devices.

## Benefits of Compass Health *Bridge*

- Enables Compass Health providers to deliver care when and where it is needed
- Expands provider availability
- Reduces travel time and increases comfort and convenience
- Offers ability to maintain systems of care during public health crises
- Enhances communication among internal care teams and clients
- Mobile devices can be controlled by providers, allowing for full client environment assessment
- Telehealth platform supports ongoing care while adhering to social-distancing guidelines

Compass Health is the only behavioral health organization in Washington to use a truly mobile telehealth solution for care delivery. For more info, visit [compasshealth.org/telehealth](https://compasshealth.org/telehealth).
